

- **Adopt a course offered in the district already**
(Easiest; make sure it is on, or added to, the a-g list for your site)
- **Adopt an A-G CTE course from the UCCI or CPA Program List**
(Linked Learning Program List is in the works!) Requires site and district approval
To receive Perkins or CPA funding, the teacher needs to have CTE credential.
- **Create a course** using models from **the UCCI or CPA Program Lists**. Requires time, and site, district, and UCOP approval. See Signature Elements.
- **Add Early College Credit** (Requires working with college faculty & district agreements)

Options for Adding Early College Credit

- Articulate a course-to-course agreement between high school and college faculty. Students receive credit by exam after the course is completed.
- Collaborate with post-secondary to allow students to enroll in college classes that fit the pathway well. (Advanced Education Dual Enrollment)
- Include Dual Enrollment (AB288) college classes in the pathway Program of Study. Both K-12 and college districts must approve CCAP agreements. Both high school and college can collect ADA/FTES. Can be embedded in a high school class with student supports. Teacher must meet minimum qualifications, but can be high school or college faculty.
- Connect Capstone to Early College Credit.
- Provide a college and career counseling class in 9th grade to start post secondary planning and career exploration.
- Collaborate with post-secondary to offer pathway-specific college courses in summer or after school.
- Collaborate with post-secondary to create Summer Bridge Programs for students recruited from multiple pathways in the sector. Offer college skills for success course.

Add AP or IB Career Pathway Courses

- Offer AP-infused college prep English to all students, with an AP augmentation zero period or afterschool to support those who will test.
- Enroll all students in AP or IB-H integrated with the career theme (e.g. AP Environmental Science, AP Computer Science). Requires student supports for equitable access.
- Combine AP Augmentation with Dual Enrollment and integrate the career theme.
- Offer IB-Career Pathways so that pathway industry fields can be the focus of IB research and other coursework.
