

NEW COURSE PROPOSAL

The process and template for submitting a new course proposal will vary depending on your district and site protocols. CCASN did find examples of more systemic approaches to course development that included training for teachers interested in developing a new course description, provision of exemplars, user-friendly templates, opportunities for feedback, and support for course development. CCASN also found new course proposal procedures that involved lengthy processes and as many as eight to ten signatures prior to submission of the new course proposal.

Use whatever process and new course proposal forms your district has in place, but think about how a District or high school might best support teachers in the development of quality courses. Provide clear guidelines and examples of what quality looks like for aspects of the course proposal. Encourage everyone involved to start early. Developing a high quality course description takes time and, depending on the school, district, or State or the nature of the course, may involve multiple approvals.

What follows are examples of new course proposal templates and processes from around the country. Included are resources from:

- *Albuquerque Public Schools, Albuquerque, New Mexico*
- *University High School, Louisiana State University Laboratory School, Baton Rouge, Louisiana*
- *Berkeley Springs High School, Berkeley Springs, West Virginia*
- *West Bend School District, West Bend, Wisconsin*
- *Center Grove High School, Greenwood, Indiana*
- *Wickenburg Unified School District, Wickenburg, Arizona*
- *North Clackamas School District, Milwaukie, Oregon (12 miles from Portland, Oregon)*
- *University of California "a-g guide, new course submission"*

FROM ALBUQUERQUE PUBLIC SCHOOLS

Albuquerque, New Mexico

COURSE PROPOSAL PLANNING AND REVIEW

High Schools

"Only those courses that are included in the *APS High School Curriculum -- District Essentials And Guidelines* or those approved on a waiver for a single school are to be offered or scheduled by any school. There is no provision made for offering credit which does not fall into one of these two categories.

The course numbers, titles, descriptions, and other parts of the course outlines included in the *APS High School Curriculum -- District Essentials And Guidelines* will be used by schools in preparing content for a course or for instituting courses. The course description section of course outlines will be used in the school course description booklets given to students for preregistration or registration purposes. However, course titles and course descriptions may appear with additional words or sentences to indicate a special emphasis or enrollment limitation at a school site.

Procedure

- A. New courses to be considered will be shaped by student needs, community needs, and/or national trends. Courses not authorized to meet graduation requirements must conform with provisions of the procedural directive on High School Elective Credit.
- B. New courses will be developed by teachers, department chairpersons, and/or curriculum assistants, in consultation with the District Coordinator of High School Curriculum using High School Course Proposal Planning Forms.
- C. A proposed new course will be reviewed by teachers in the department. Chairperson will sign the completed form in the space provided.
- D. After department review, the course proposal will be sent to the high school assistant principal for curriculum for review and signature indicating that the proposed course has been reviewed by all appropriate curriculum committees at the school.
- E. The high school principal will review the proposed course. The principal's signature indicates that the school as a whole supports the course and is prepared to offer it.
- F. The principal will send the proposed course to the District Coordinator for High School Curriculum for approval.
- G. The Course Proposal Planning Form for the new course will be returned to the District Coordinator for Curriculum Development who will publish the course outline and distribute to the appropriate personnel for inclusion in the *APS High School Curriculum -- District Essentials And Guidelines*

University High School

Louisiana State University Laboratory School

Baton Rouge, Louisiana

New Course Proposal

“All courses taught during the regular school year at University High School are detailed in the Master Course Book, maintained by the Counseling Department. Course offerings for each year are drawn from this book.

A faculty member may seek approval for a new course by taking the following steps:

1. Preparation of Proposal with Department Chair

The faculty member and his/her department chair should prepare a brief proposal for the new course. The proposal should include: a brief rationale for the course; a complete course description including alignment with state, national, and professional standards; a proposed textbook and estimated cost.

The course description must follow the standard template of the Master Course Book.

Department chairs must agree to all new course offerings. In preparing the course proposal faculty may also want to consider the Guidelines for Policy and Procedure Proposals: courses are more likely to be accepted if they can adhere to the mission of the Laboratory schools and they are supported by data and research.

2. Recommendation from Department Chairs Committee

The department chair should bring the proposal to the department chairs committee. Proposals must be submitted to the department chairs committee before December 1 to be eligible for scheduling for the following school year. The department chairs will submit a recommendation regarding the course to the administration for review.

3. Review by Administration

Administration will make course scheduling decisions based on these recommendations and their discretion. Factors influencing scheduling decisions include but are not limited to: financial obstacles, coherence with other aspects of the curriculum, personnel issues. If administration chooses not to approve a recommended course, they may want to discuss this decision with the department so that revisions might be made to the course or other options can be explored by the department.”

Berkeley Springs High School

Berkeley Springs, West Virginia

**Proposal for New Elective Class
at Berkeley Springs High School (BSHS):
Civics Laboratory**

From Merriam-Webster online dictionary, <http://www.merriam-webster.com/>:

- ❖ Civics: a social science dealing with the rights and duties of citizens
- ❖ Laboratory: a place providing opportunity for experimentation, observation, or practice in a field of study

Rational:

1. While nationwide voter turnout in the 2008 election was higher than it has been in 40 years at 61.6%, the state of West Virginia had the lowest voter turnout in the nation at 50.6% (“2008 Election Turnout Hit 40-Year High”, <http://www.cbsnews.com/stories/2008/12/15/politics/main4670319.shtml>). Without high levels of citizen participation, democracy is at risk.
2. The Partnership for 21st Century Skills describes a 21st Century Learning Environment as one that “Enables students to learn in relevant, real world 21st century contexts (e.g., through project-based or other applied work)” and “Supports expanded community and international involvement in learning, both face-to-face and online”. (http://www.21stcenturyskills.org/index.php?option=com_content&task=view&id=354&Itemid=120). Additionally, the Partnership lists civic literacy as one of the 21st Century Themes that must be developed in schools so that students are:
 - * Participating effectively in civic life through knowing how to stay informed and understanding governmental processes
 - * Exercising the rights and obligations of citizenship at local, state, national and global levels
 - * Understanding the local and global implications of civic decisions(http://www.21stcenturyskills.org/index.php?option=com_content&task=view&id=258&Itemid=120)
Further, the Partnership lists the following as desired 21st Century Student Outcomes:
 - * Creativity and Innovation Skills
 - * Critical Thinking and Problem Solving Skills
 - * Communication and Collaboration Skills
 - * Information, Media and Technology Skills(http://www.21stcenturyskills.org/index.php?option=com_content&task=view&id=54&Itemid=120)
3. The Civics Laboratory class addresses all of the needs described in items 1 and 2 above.

Course Description:

Students will explore, create and develop real-world, hands-on solutions that contribute to the sustainability of democracy.

1. E-Government project: The Community Connect Foundation, with funding from the Benedum Foundation, has provided Ms. Stotler with video and still photography equipment for students to create content for a statewide web portal designed to make local governments accessible to citizens. Students will work with local government officials to obtain content that will help citizens understand and interact with local government. In Morgan County, government entities with which students would coordinate would include all Morgan County elected officials, their offices and appointed boards, the Towns of Bath and Paw Paw, the circuit court system, and the Morgan County Board of Education.
2. Community Board project: Currently, the BSHS Student Council is creating the framework for a project to place students on boards and committees within the community. An independent study credit will be awarded to students who serve on boards for the duration of a school year and who meet the requirements established to obtain credit.
3. Students will generate publicity for their projects with local media outlets to make sure the public is made aware of the opportunities for civic engagement that will be offered. This will include writing articles for newspapers, seeking coverage on the Hagerstown NBC-25 TV news program, and speaking at meetings of community groups (Chamber of Commerce, Lions Club, church affiliated groups, etc.) and at school assemblies.
4. Students will document the class' activities using journals, video, website, or whatever media the class elects in order to show others what they have accomplished during the school year.
5. Students will discuss and debate issues of civic concern, based on class activities and current events, employing techniques for discerning different points of view and drawing sound conclusions based on the arguments and evidence presented.

Eligibility:

Students in the 10th, 11th, or 12th grade would be eligible to participate in this class, based on a recommendation from their previous Social Studies teacher.

Collaboration:

Ideally, the Civics Laboratory class would work in collaboration with the New Media class, who would serve as the technical experts while the Civics Lab class would serve as the content experts. Therefore, it would be extremely helpful for these 2 classes to be scheduled during the same period of the day.

_____ Prepared by Kate Stotler at Berkeley Springs High School in participation in the Morgan County's E-Government Project.

NEW COURSE PROPOSAL PROCEDURES

“The timeline for proposing new courses begins in the spring of one school year and ends in December of the next. This will allow for board approval of new courses prior to student pre-registration. This timeline will also provide time for curriculum development during the summer.

The purpose of maintaining a specific timeline and procedure is two-fold: first, to ensure that teachers have the opportunity to develop new avenues of learning for students and second, to provide a system of communication to ensure new courses are of the highest quality.

The steps in the course proposal process are:

Step 1

- The teacher initiates a course proposal by completing Part 1 of the course proposal form.
- Paper work to be included with Part 1: Course Outcomes, Assessment Descriptions, Unit/Benchmark Descriptions, and Supporting Resources.
- Teacher presents the proposal to the leadership team.

Step 2

- The principal and leadership team evaluate the proposal and paper work at their meetings. The team then completes Part 2 and 3 of the Course Proposal.
- The proposal (Parts 1, 2,3) is then forwarded to the Director of Elementary or Secondary Curriculum with the team’s recommendations.
- The Director of Elementary or Secondary Curriculum will evaluate the proposal, share with district staff, and make recommendations to the governing board.

The timeline and communication procedures will ensure:

1. Teachers are receiving adequate feedback regarding alignment with district and state standards.
2. Accurate information is provided regarding deadlines and requirements.
3. All those affected by new courses will have an opportunity to voice suggestions.
4. Any concerns with a proposal can be addressed in an efficient and timely manner.
5. Students are only registered for classes that have been approved by the governing board.

III. IMPACT STATEMENT

The following areas represent the evaluation criteria applied to all course proposals. Please review and answer them carefully.

A. IMPACT ON YOUR CURRICULAR AREA

1. How does it change the current “balance” or proportion of curriculum offerings?
2. How does it affect the current course sequences within your curricular area?
3. Does it duplicate the content of a course currently offered in your curricular area?
4. Could technology enhance this course? If yes, please describe.

B. IMPACT ON GENERAL STUDENT PROGRAM

1. How will it affect graduation requirements for students?
2. How will enrollment in this course impact other departments?
3. How might this course help prepare students for the successful completion of their high school culminating project?

C. IMPACT ON DISTRICT/STAFF RESOURCES

1. Do you have sufficient highly qualified staff to teach this course?
2. Do you have the necessary facilities, equipment, and materials?
3. Funding: Please complete section VI if necessary.
4. What is the anticipated enrollment in this course?

**North Clackamas School District
NEW COURSE PROPOSAL APPLICATION**

Milwaukie, Oregon

<http://www.nclack.k12.or.us/page/1106>

The new course proposal application is for staff designing new courses that support student achievement of NCSD graduation requirements, including required credits, career experiences, and performance standards in reading, writing, speaking, and math. Particular attention should be given to curriculum and instruction that meets the needs of students with disabilities, Talented and Gifted students, and English Language Learners. Proposals must be complete with all requested information before being forwarded to high school curriculum and counseling assistant principals (CCAPs) or middle school principals and the Coordinator of Secondary Programs.

To ensure new course are approved in a timely fashion for the upcoming year, two New Course Proposal cycles are provided.

Cycle I:

October: Work session to learn process, see exemplars, receive resources, answer questions.

January: Proposals reviewed by CCAPs or MS principals depending on course level.

March: Instruction Team meets with teacher and reviews paperwork.

April: Proposal is taken to the Board of Directors for approval.

Cycle II

December: Work session to learn process, see exemplars, receive resources, answer questions.

March: Proposals reviewed by CCAPs or MS principals depending on course level.

May: Instruction Team meets with teacher and reviews paperwork.

June: Proposal is taken to the Board of Directors for approval.

New Course Proposal Application Form

I. Course Information

- A. Date of Application
- B. School
- C. Teacher(s) submitting request
- D. Course Title
- E. Subject Area
- F. Highly Qualified Teacher Certification Requirements
- G. Circle type of credit:
 Required: Math, SS (WH, GV, US, PL) Science, LA, PE, and Health
 Elective/Selective: Math, SS (WH, GV, US, PL), Science, LA, PE, Health, FA, and AP.
- H. If high school elective credit course, check the Focused Program(s) of Study in which the course will be a focused elective. All high school focused elective courses are required to include the requirements for focused elective courses, including a well-designed Career Related Learning Experience (CRLE)
 AC___ BM___ HS___ HRS___ IES___ NR___
- I. School year to be implemented:

 IF Yes,, in which course(s)?
- O. Articulation with college for credit? Yes ___ No___
 If yes, name of college
 Number of credits College course:
- P. Can this course be repeated for credit? Yes___ No___
- Q. Who is the intended student audience (all students, TAG, SpEd, ELL)? Explain.

II. Directions for Completing Scope and Sequence Template

Complete the electronic version of the Scope and Sequence template (available on the Secondary Programs web site), and complete the columns for each unit in the proposed course. Consult with your principal, assistant principal, and district TOSAs for Special Education and ESL services for assistance

New Course Scope and Sequence Template*
 Sample Form

Course Title
Curriculum Guide Description

Scope and Sequence						
Course Content What will students be expected to know and do? Provide the core knowledge and skills (state standards and/or industry standards) that will be taught and assessed. Organize the content standards by unit, framing questions(s), or project title to sequence from the beginning to the end of the course		Required for Focused Elective Courses Additional Course Content		Student Activities What will students do to demonstrate their learning? What products and/or performances will students complete?	Assessment Tools What assessment criteria or tools will you, the teacher, use to measure student progress and achievement?	Special Education, ELL & TAG Accommodations How will curriculum, instruction and/or assessments be accommodated to meet the needs of each student? Select one unit and provide examples.
Unit Topic or Framing Question(s) or Project Topic	Core Academic and Professional Knowledge & Skills	Focused Program of Study Unifying Concepts	Career Related Learning Standards (CRLS)			
Unit 1						
Unit 2						
Unit 3						
*CRLE taught within Unit #__						

- Each Focused Elective must include at least one Career Related Learning Experience (CRLE). Attach a completed CRLE Teacher Planner (see pages 6 & 7), and also indicate in the Scope and Sequence where instruction regarding the CRLE will occur.
- See Secondary Programs web site for legal and letter size landscape template.

III. QUESTIONS

Provide written responses to the following questions and be prepared to discuss them with MS principals or CCAPs and the district instruction Team.

1. How does this course align with current building and district offerings?

If a significant amount of content taught in this course is taught in other district courses or programs, how is this course different?

2. What data indicates this course should be added?

(i.e., support student attainment of state and NCSD performance standards, industry standards required for professional technical/apprenticeship program, support student demonstration of career-related learning standards, provides career related learning experience opportunity, occupational projection, FPS enrollment, focused elective need, graduation requirement)

3. Who is the intended student audience (all students, TAG, SpEd, ELL)? Explain.

4. How will highly qualified staff be made available within the projected FTE allocation?

IV BUDGET CONSIDERATIONS

- A. Textbook/materials
- B. Equipment
- C. Operating expenses, fees, or registrations
- D. Other
- E. Total Estimated Cost

What building account(s) will provide needed funds?

V. Required Signatures

Obtain signatures form A, B, C, D, and E prior to forwarding this proposal to the Coordinator of Secondary Programs

- A. Department Chari/Coordinator:
- B. Curriculum Assistant Principal:
- C. District Sp. Ed. TOSA:
- D. District ESL TOSA:
- E. Principal:
- F. District Approval:
- G. Date:

*CRLE Teacher Action Planner

(Check all that apply)
(AC *BM *HS *HR *IES *NRS

3. Unit of Study:

4. Essential Question(s)

5. CRLE will be structured so that students work:
(Circle all that apply.)
in small groups
as a class
individually

6. Key Learning Objectives Addressed:

Five Essential Components:

Inquiry: Students address an essential question related to the course content that might be tackled by an adult in the workplace or community.

Adult Connections: Students work with at least one adult with expertise in a relevant career field.

Product: Students create a product that connects course content with life and work beyond the classroom.

Professional Standards: Students demonstrate applicable Career Related Learning Standards and identify evidence in their work.

Reflection: Students describe what they have learned.

In what ways will all five CRLE essential components be integrated into the experience?

7. Inquiry (What kind of research will students complete to answer the EQ?)
8. Adult Connections:
9. Product(s):
10. Professional Standards
(See Career Related Learning Standards)
11. Reflection

- See Secondary Program web site for template <http://www.nclack.k12.or.us/page/1106>

NOTE: Professional Standards – Career Related Standards include:
Personal Management (work ethic)
Problem Solving

Communication

Teamwork

Employment

(Foundations-

Demonstrate academic, technical, and organizational knowledge and skills required for successful employment)

Career Development – Demonstrate career development skills in planning for post-high school experiences.

CALIFORNIA – SPECIFIC

New Course Proposal Templates in California

(alignment with UC Office of the President “a-g” templates)

In California, many Districts model their New Course Proposal forms on the Templates used by the University of California Office of the President for New or Updated Course Submission. In order to be approved as a college preparatory course that meets the admissions requirements for University of California and California State University, high schools must submit their new course descriptions to UCOP for a-g approval.

“a” – History/Social Science;

“b” – English;

“c” Mathematics;

“d” – Laboratory Science;

“e” – Language Other Than English;

“f” – Visual and Performing Arts;

“g” Elective

__ History/Social Science, __ English, __ English-ESL/ELD, __
Mathematics, __ Statistics, __ Science-Biological, __ Science-Integrated,
__ Science-Physical, __ Language Other Than English, __ Visual and
Performing Arts, __ Interdisciplinary, __ Other

In addition, if a course is classified as a Career Technical Education, then as part of the course submission process, you must indicate the Industry Sector and Career Pathway

The Basic Course Submission Template asks for (among other requested information):

School Information

School Course List Contact Information

Teacher Information

Course Title

Transcript Title(s)/Abbreviation(s)

Course Code(s)
Brief Course Description
Pre-Requisites:
Co-Requisites.
Background Information
 Context for the Course
 History of Course Development
Textbooks (detailed information)
Supplemental Instructional Materials

For each course, the school/district must also complete a subject-specific template. The required information for Subject-specific templates varies. For example, laboratory science courses require descriptions of the labs students will complete, The Visual and Performing Arts template includes sections on Artistic Perception, Creative Expression, Historical and Cultural Context, Aesthetic Valuing, and Connections, Relationships, and Applications. English and History templates require details on writing and reading assignments.

All of the subject specific templates ask for information on:

Course Content
Course Purpose
A detailed course outline
Detailed descriptions of Key Assignments
Instructional Methods and/or Strategies
Assessments including methods and/or tools.

To view A-G Course Evaluation Guidelines used for Review of A-G Course submissions, visit <http://www.ucop.edu/agguide/updating-your-course-list/submitting-courses/index.html> AND <http://www.ucop.edu/agguide/updating-your-course-list/files/A-G%20Course%20Evaluation%20Guidelines.pdf>
